- **Increment - 2 :**

Creation of all other page activities and their Navigations : As there are total 8 page activities in the product, there are 6 activities left and are to be completed in the 2nd Increment. Navigation among the activities based on the user interaction with the application also needs to be implemented in the 2nd Increment of the project

- **Increment - 3 :**

Collection of data and data validation : Real time data of the technicians are collected for the integration purpose in this increment. Also the data that is collected from the user inputs needs to be validated and thus the implementation of that validation process will be done during the 3rd Increment itself.

- **Increment - 4 :**

Database Integration and End to End system Testing : The final database that is collected about the technician's list and also the data collected from user side needs to be integrated to the application in the 4th Increment. Testing for the final product i.e system testing will be taken care in the 4th increment itself

## 2) Project Timeline

- Increment - 1 : 02/19/2016
- Increment - 2 : 03/11/2016
- Increment - 3 : 04/06/2016
- Increment - 4 : 04/29/2016
